## 1. INTRODUCTION

Magestore is glad to introduce the apparent of Image Option extension which is an awesome supplement to custom options. This extension permits you to add images next to custom option values, such as names of products, thereby making it clearer and more attractive to customers. Moreover, Image Option supports four types of customers' option: checkbox, radio button, dropdown list and multi select. Your customers will certainly find product more convenient and interesting when browsing your website. Make your web-store increase sales by installing Image Option!

### **Outstanding features:**

- ✓ Easy to upload images for custom options
- ✓ Support almost types of custom options: checkbox, radio button, dropdown list and multi select
- ✓ Customers can select an option value by clicking directly on the image
- ✓ Easy to install, no impact on your current page
- ✓ Enable to set size for images
- ✓ Create custom options for product by using options template
- ✓ Manage template for options template for more products at the same time
- ✓ Support for multi stores

## 2. HOW TO INSTALL

- After purchasing, you can download the file at once, license key will be sent to your email. The file that you download normally is a zip file. Unzip it to a folder.
- Use FTP client (like Filezilla, WinSCP, cuteFtp) to upload (copy) all folders in the zip package to your Magento site root folder. This will not overwrite any existing files, it only add new files to the folder structure.
- After uploading is done, Log in your Magento administration panel to refresh cache. Go to System > Cache Management. Select all caches and take action “Refresh” then submit.
- Navigate to System > Configuration, if you can see the extension tab, it is installed properly. Remember to put your license key to the License key management so that the module could be activated.
- Now if you get Access denied error when click on the extension tab, you need to log out admin panel and log in again.
- Go to front-end and try to process, make sure that everything is OK.

## 3. FUNCTIONS GUIDE

### 3.1. Create options template

Steps to take:

- Go to **Admin** page and select menu **Catalog -> Imageoption templates**
- Click button **Add Imageoption Template** on top-right
- Enter title and description for template
- Click tab **Option** at the left
- Create customer options for this template same the product
- Click tab **Assigned Products**
- Select products that will see this options template
- Click button **Save and Continue Edit**

And then, you see input file for each option values that have been created recently

- Select image file for them, set width size for images
- Click button **Save and Continue Edit** or button **Save**

At the moment, you can click on button **Apply Template** on Template Edit page to apply a template for all assigned products. Note that a template can apply only one time for each product. After that, you can select options templates for product on Product Edit page.

### 3.4. Display on the Front-end:

Go to view the product that you recently add option image on the front-end.

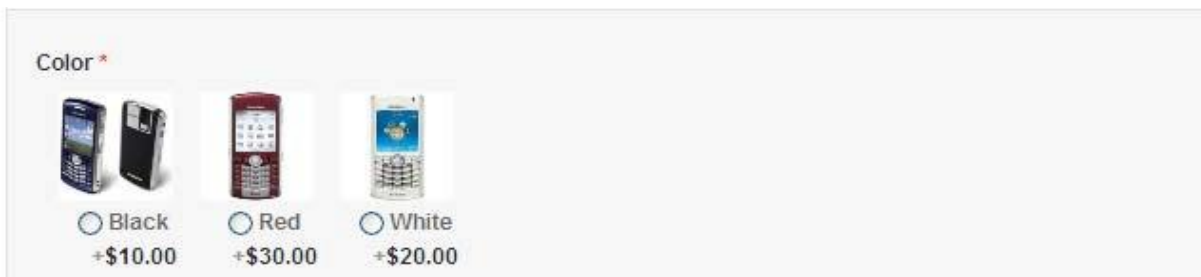

Image is changed base on the value of custom option. Also custom can select an option by select an appropriate image.

#### ❖ Dropdown type

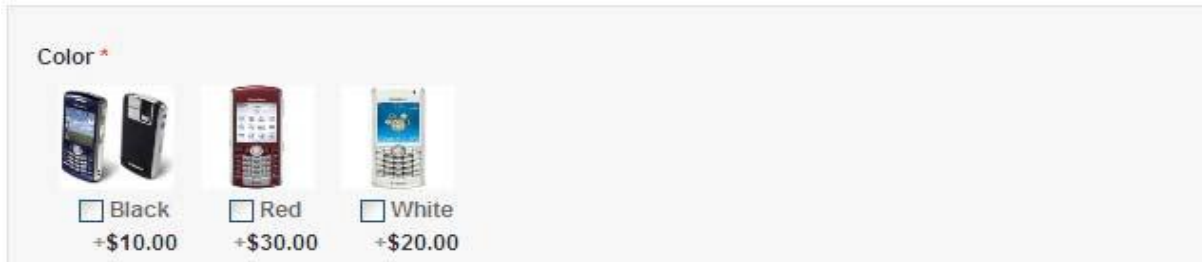

A screenshot of a product configuration interface. At the top, the label "Color \*" is followed by a dropdown menu. The dropdown menu is open, showing the selected option "Red +\$30.00" and a small blue downward arrow on the right. Below the dropdown menu, there are three small images of mobile phones: a black one, a red one, and a white one.

#### ❖ Radio type

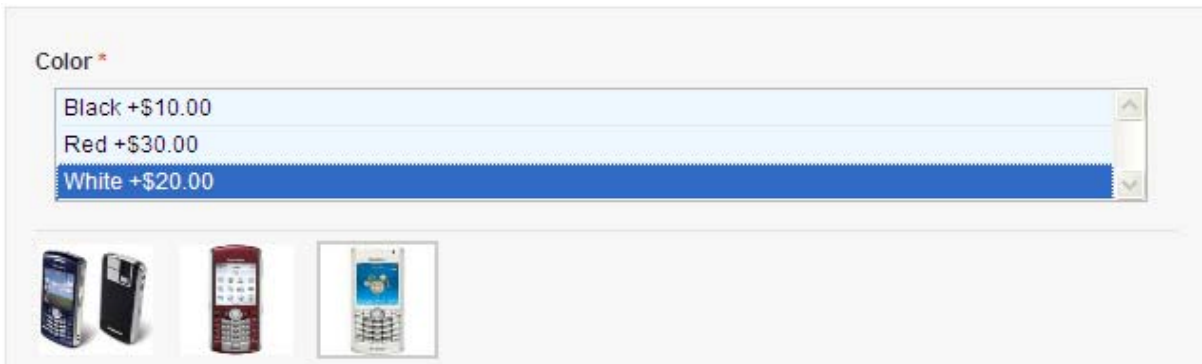

A screenshot of a product configuration interface. At the top, the label "Color \*" is followed by three radio button options. Each option consists of a radio button, a color name, and a price increment. The options are: "Black +\$10.00", "Red +\$30.00", and "White +\$20.00". Below each radio button is a small image of the corresponding colored mobile phone.

## ❖ Checkbox type

## ❖ Multi Select
